

I have been a subscriber of XM Radio for about 7 months. I find the weather and traffic updates very helpful especially when traveling out of state. I am paying for these services and I believe I should be able to continue receiving the product I pay for. I believe the NAB has no business telling me or XM radio what we can or can not do. It is none of there business and I ask you to reject NAB's petition 04-160 and allow XM to give us the service we need at home and on the road.
